PRODUCT INSTALLATION

After opening the package, please confirm that you have received all parts listed above. If you are missing any parts, please contact us.

PRODUCT INSTALLATION

BEFORE INSTALLATION

IMPORTANT! Before installing the product, please make sure that you meet all the requirements listed below.

Power Requirements

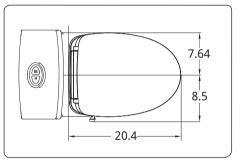

- ▶ The power rating should be within the required range (AC 120V ± 10%, Max current 10A above)
- ▶ The power outlet should be close enough to reach the power cord (1.2m) but far from where water can hit it.
- ► This product must be grounded.
 - The wiring should be installed by a professionally licensed electrician.
 - Please do not plug in the product before installation is complete to prevent malfunction.

Water Requirements

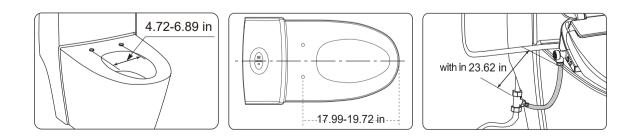

- ► The minimum dynamic water pressure required is 0.08MPa.
- ► The maximum static water pressure required is 0.8MPa.
- ▶ Water pressure below the min and max range above will affect the performance of the product.

Sizing Requirements

▶ Please measure your toilet to make sure that there is enough space for the bidet (20.4 in long).

- ► The distance between the 2 mounting holes must be within 4.72-6.89 in.
- ► The distance from the filter to the bidet inlet should be 23.62 in or less.
- ▶ The distance between the mounting holes and the edge of the toilet bowl must be within 17.99-19.72 in.

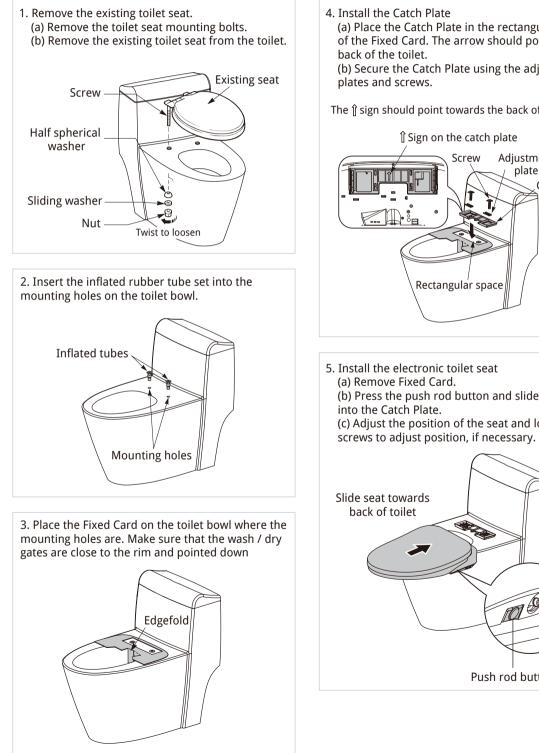

**The product has no Ground Fault Circuit Interrupter, It should be installed in the line with Ground Fault Circuit Interrupter, Otherwise, the accidental failure of this product may result in the loss of life or property.

PRODUCT INSTALLATION
